INTRO

AI Product Manager with 7+ years of experience designing and scaling AI-powered products that deliver intelligence, personalization, and actionable insights for users and operations. Experienced at the intersection of product, data science, and business teams to bring models from concept to real-world impact. My expertise spans speech analytics, recommendation systems, prompt engineering, GenAI summarization, personalization, and model evaluation frameworks, consistently driving measurable business and user outcomes.

Skills: **AI & Data:** LLMs, Prompt Engineering, RAG, Recommendation Systems, Personalization, Speech Analytics, Model Evaluation, Precision & Recall, AI Quality Metrics, Human-in-the-Loop Systems, Behavioural Insights, Experimentation Frameworks. **Product & Strategy:** Product Strategy, Roadmapping, PRDs, User Research, A/B Testing, KPI Definition, Agile Delivery, Cross-Functional Leadership, Go-to-Market. **Automation & Workflow Tools:** Make, Zapier, n8n. **AI/Product Design Tools:** Figma AI, Cursor, Lovable, Claude Code, Antigravity. **Analytics & Collaboration:** SQL, BigQuery, Mixpanel, GA, HotJar, Kibana, SharePoint, Asana, MS Office, Notion, JIRA, Confluence, Miro. **Cloud & Technical:** AWS/GCP fundamentals, API concepts.

WORK EXPERIENCE

12/2025 – present

Micro1 Inc. – California (US)

Freelance Product Manager – AI Task & Prompt Design

- Lead the design, optimization and review of complex AI task prompts and evaluation frameworks for AI Agents, driving measurable improvements in model output quality and reliability at scale.
- Establish and refine rigorous assessment rubrics to standardize quality benchmarks, enabling consistent evaluation and continuous performance improvement of agentic AI models.
- Drive cross-functional collaboration in a remote environment, leveraging user feedback and data insights to iterate on AI workflows.

10/2024 – 11/2025
(Contract)

Telefónica Germany GmbH – Berlin (DE)

AI Product Manager – Customer Service QA Automation

- Led AI transformation of customer service by replacing manual call quality reviews with ML-driven speech analytics, boosting coverage from 15% to 90% and cutting manual effort by over 60%.
- Led discovery to identify and validate AI opportunities within QA operations by analysing workflow bottlenecks, reviewing manual evaluation processes, and assessing feasibility of speech analytics and LLM-based scoring before defining the product roadmap.
- Defined AI labelling standards, validation criteria, and evaluation metrics (precision, recall, false positives/negatives, agreement rates) with ML and QA teams, supported by dashboards and human-in-the-loop review for accuracy and compliance.
- Translated operational feedback into product requirements and workflow improvements.
- Built KPI dashboards to measure automation impact across agent productivity, and service quality.
- Positioned AI automation within broader operational strategy, aligning stakeholders across operations, engineering, and compliance.

07/2023 – 09/2024

CLIQup Social UG – Berlin (DE)

Product Manager – AI Social Matching & Growth

- Built and scaled an AI-powered social matching platform from 0 to 3,000+ users.
- Designed and shipped AI-driven personality matching engine and automated friendship plan system, leveraging behavioural data, user traits, intent signals, and engagement patterns to improve match relevance and user engagement.
- Used experimentation and data analysis to validate AI-driven matching effectiveness and optimize recommendation quality.
- Led product strategy, roadmap, and cross-functional execution across engineering, design, analytics, and marketing.
- Conducted user research (interviews, surveys, personas) to validate hypotheses and shape feature direction.
- Defined engagement, retention, and onboarding metrics, driving over 70% growth in user engagement.

11/2021 – 06/2023

Joblift GmbH – Berlin (DE)

Product Manager – AI Recommendation Engine

- Led the development and scaling of AI-driven job recommendation platform across Europe and US markets.
- Partnered with data science teams to improve model and recommendation quality using behavioural data, preference signals, GenAI summarization, and output quality frameworks to strengthen personalization logic.
- Designed and ran A/B tests and product experiments using performance and behavioural metrics, driving 40% revenue growth and a 250% increase in product stickiness.
- Translated raw data insights into backlog priorities and UX improvements for the JobCoach application.
- Coordinated cross-functional delivery across product, UX, data science, and operations.

11/2018 – 10/2021

RK Kutting GmbH – Heilbronn (DE)

Product & Project Manager (Hardware + Digital)

- Managed full lifecycle of hardware and digital products from ideation to release, improving manufacturing processes by 50%.
- Coordinated cross-functional development across engineering, QA, and external suppliers.

EDUCATION

04/2026 – 06/2026

Bootcamp in AI Software Engineering, Digitale Leute (DE)

Capstone: [Aura](#), an AI social-matching app turning natural-language input into explainable, deterministic matches. Built the MVP end to end.

09/2015 - 10/2017

M.Sc Global Innovation Management, University of Strathclyde (UK), Technische Universität Hamburg (DE)

09/2009 – 07/2014

B.Eng. Mechanical Engineering, University of Ilorin (NG)

LANGUAGE, COURSES AND OTHERS

Language Skills

English – Native
German – Intermediate (B2)

Courses & Certifications

Product Management Masterclasses (Udemy, Product School), Design Thinking (IDEO), Figma, JIRA/Confluence, Prompt Engineering (Coursera), Cloud Architect Program (GoCloud Careers).

Others

Citizenship - German
